Appearance: Liquid

- A probiotic biological washroom cleaner which works by degrading organic soiling to eradicate stains and odours
- Use on porous washroom surfaces such as flooring materials and tile grouting
- Can be used on all washroom fittings including stainless steel and marble surfaces

AREAS OF USE

ENVIRONMENTAL

HOW TO USE

Odour Problems

Spray or swab contaminated surfaces, work well into the soiling with a clean damp cloth or damp mop. Leave to work for a few minutes before wiping away any excess liquid. Do not rinse but allow to dry slowly. Repeat on aged problems. Spray and wipe contaminated and soiled areas regularly.

Mop Application:

Severe Odours Use 1:1 with water
 General Maintenance Use 1:20 parts with water

Sink & Waste Outlets: Pour a little into sink and urinal outlets during quiet periods or at night.

**The use of disinfectant, bleach or caustic substances will destroy the microorganisms used in this technology.*
