

**CASE STUDY**

BAM

LEADING UK FACILITIES MANAGEMENT PROVIDER

BAM FM, a leading UK facilities management provider committed to environmentally friendly cleaning solutions, working with Arrow to explore Arrow's sustainable Quick & Easy® range. Arrow's dedicated WorkSmarter Programme provided the perfect platform to evaluate the benefits of this innovative system.

SUSTAINABILITY MEETS EFFICIENCY

By adopting Arrow's Quick & Easy® range, BAM FM not only enhanced their sustainability efforts but also achieved notable cost savings and operational efficiencies. This trial highlights the potential of Arrow's solutions to drive progress and set new benchmarks for sustainability in the facilities management industry.

AT A GLANCE

**8 week
trial period**

**39% cost
savings**

**80% chemical
range reduction**

**Saved 1.9kg
fossil resources**

THE TRIAL

To accurately assess the impact of the Quick & Easy® range, an eight-week trial was conducted across two identical BAM-managed buildings. These sites shared the same size, shift patterns, and cleaning teams, ensuring a fair comparison.

At one site, traditional cleaning chemicals were replaced with Arrow's Quick & Easy® range. The other site, unaware of the trial, continued using their standard cleaning chemicals. Weekly monitoring was conducted to measure product usage and performance.

OUTCOME

The trial delivered remarkable results, proving the effectiveness of Quick & Easy® – with the system offering unique efficiency-saving features including:

Unique foam sprayhead

Maximum efficiency and user safety.

Integrated water cartridge system

On-the-go refilling reduces time-on-task.

Lock-and-key chemical exchange

Quick, easy product exchange and no waste.

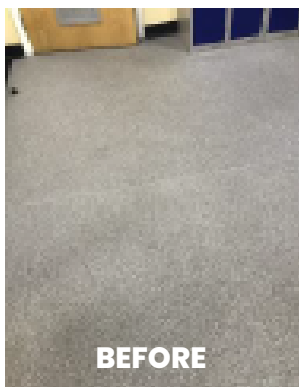

Innovative self-dosing mechanism

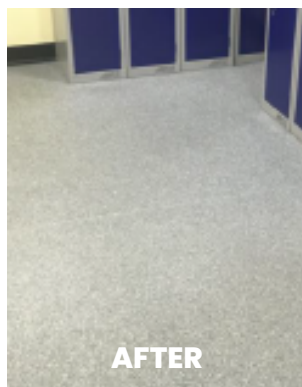

No set-up time and automatic, exact dosing

Implementing Quick & Easy® also significantly improved site sustainability, reducing product range by 80% while minimising environmental impact through 100% sustainable, Cradle to Cradle accredited chemicals – delivering the following results:

- **80% reduction in chemical products** – Reduced storage and fewer deliveries required.
- **39% cost savings** – Less than one bottle concentrate used over eight weeks.
- **Multipurpose efficiency** – Streamlined cleaning tasks and improved productivity.
- **1.9kg fossil resources saved per kg of product used** – Verified by an accredited Green Care® savings calculator.

BEFORE

AFTER

“THE AUTOMATIC DOSING MADE EVERYTHING SO MUCH EASIER. ONE CARTRIDGE LASTED OUR TEAM FOR MORE THAN EIGHT WEEKS!”
